EDUCATION

ENSAE Paris

Engineering Degree in Data Science (Master's level)

Palaiseau, France

Sep. 2021 - Dec. 2024

- Statistics, Machine Learning, Deep Learning

Lycée Saint-Louis

Preparatory classes

Paris, France

Sep. 2019 - Jun. 2021

- Mathematics, Physics, Chemistry, Computer Science

PROFESSIONAL EXPERIENCE

Hello Pomelo

Data Consultant

Barcelona, Spain

May 2026 - Present

Delivered data projects from requirements gathering and planning through technical execution; framed internal Claude usage; supported teams implementing AI solutions for clients.

- Financial KPI dashboard in *Tableau* for a group (EUR $\sim$ 100m revenue), consolidating **7 data sources** and **200+ attributes** in *Snowflake* and *dbt*
- OCR pipeline (supplier catalogue $\rightarrow$ product records), with **95%** of product records completed without manual rework on *OVH*

Aubay (SNCF)

Data Scientist Consultant

Saint-Denis, France

Jan. 2025 - Apr. 2026

Developed predictive-maintenance solutions, from multi-source data preparation to business reporting.

- *XGBoost* and *Random Forest* models for critical-defect detection, achieving **80.8% recall**
- Spatiotemporal ETL with *Pandas* and *sk-learn*, with *Power BI* dashboards for business KPI monitoring
- Contributed to an MLOps pipeline operating on nationwide datasets

Aubay

ML Research Intern

Boulogne-Billancourt, France

Jul. 2024 - Dec. 2024

- Machine unlearning: research and implementation of state-of-the-art techniques
- Fine-tuning of *LLaMA* and *RoBERTa* models (prompt classification & embedding corruption)

Deloitte

Operations Research Intern

Paris, France

May 2023 - Aug. 2023

- Mathematical modelling (MILP) of combinatorial optimization problems (scheduling & routing)
- Solved NP-hard problems using heuristic methods (*Google OR-Tools*)

TECHNICAL SKILLS

ML & Stats	Python: PyTorch, JAX, Scikit-learn, SHAP, HuggingFace, OR-Tools
Data Eng	Docker, Kubernetes, Git (CI/CD), Dataiku, PostgreSQL, Snowflake , dbt
Data Viz	Power BI, Tableau, Streamlit, Plotly
Tech Tools	Claude/Codex, n8n, Supabase, Modal, GCP , Microsoft Fabric , PIM
Languages	French (Native), English (C1+), Chinese (B1)

PROJECTS

MEWE Architects Grenoble, France
AI Engineer (Freelance)  *4 months*

- Multimodal RAG pipeline (Mistral/HF OCR + GCP/OpenAI) for legislative document analysis
- Backend development with *FastAPI*, data validation via *Pydantic*, and *PostgreSQL* database
- Frontend application with *Vite + Vue*, deployed on *Firebase* and *Supabase* Edge Functions

Franchises Global San Diego, USA
AI Engineer (Freelance)  *2 months*

- Semantic recommendation system (Embeddings) and web scraping with rate-limiting
- Automated classification and named-entity recognition (NER) via LLMs for profiling

ENSAE Paris Palaiseau, France
Machine Learning & Deep Learning *2021 - 2024*

- Transport optimization algorithm (*JAX* with GPU acceleration)
- Implementation and training of a GPT architecture from scratch (*PyTorch*)
- Implementation and optimization of Multi-Armed Bandit algorithms for online learning
- Bayesian Statistics for variable selection

CONTINUOUS LEARNING

ML/AI Engineering
Production Pipelines *2025-2026*

- Multimodal AI pipeline to turn PDFs into narrated audiobooks/videos, using LLMs, TTS, scene generation, and automated validation. 
- Real estate prices prediction with training/deployment pipelines (ZenML, MLflow, Docker, CI/CD) 

Backend Engineering
Backend Development Courses (www.boot.dev) *2025*

- Complexity, memory management, data structures, OOP, and Dynamic Programming
- Developed a RAG system from scratch , AI Agents (tools), and scalable HTTP servers
